

***K9 FullFlex™*** contains cutting edge organic ingredients clinically proven to reduce joint discomfort, strengthen connective tissue and enhance bone and joint integrity - in an easy to feed liver flavored wafer. ***K9 FullFlex™*** helps enable freedom of movement and sustained comfort for your dog!

***K9 FullFlex™*** is the latest-generation joint product, utilizing the best of modern science to bring your dog all day long comfort with no side effects. A dog's joint pain typically starts from the normal wear and tear of the joints as they age. This is often caused by the deterioration of cartilage which allows bone-to-bone contact. But 21st century science has provided us with the most powerful treatment options ever available. ***K9 FullFlex™*** contains cutting edge ingredients that both relieve pain and helps to reverse and repair the damage from normal aging. ***K9 FullFlex™*** helps both short term and long term to increase your dog's comfort level in several different ways:

**Joint Repair - Growth Factors:** A main mechanisms by which ***K9 FullFlex™*** helps the body address the damaged joints is by providing bone and joint growth factors that stimulate joint repair. These growth factors are small protein molecules derived from the thin membrane lining the inside of an eggshell. This is where chicken embryos get their joint growth factors needed for their bones and joints to form as they develop into chickens. Aloha Medicinals works closely with the world's leading protein chemists that developed the methods for purifying these growth factors into the bioavailable form that dog's can use to repair damaged joints. A chicken embryo will develop into a fully formed chicken in just three short weeks, and the results are just as quick in dogs – usually resulting in significant improvements in the dog's mobility in as little as two to three weeks!

**Joint Repair - Immune Mediation:** By enhancing and normalizing the body's immune response, the body is able to mount a potent defense against joint damage. This works even in autoimmune joint problems, since ***K9 FullFlex™*** simply does not stimulate the type of immune function that attacks the normal joint tissue, but works at the differentiation level of the cellular immune system. ***K9 FullFlex™*** enhances the body's ability to repair joint damage by providing the trigger compounds needed to mount a normal immune defense, either down-regulating in the case of an autoimmune attack or enhancing and accelerating the healing response as required. ***K9 FullFlex™*** does this by combining the immune-activating polysaccharides from authentic ***K9 Immunity™***, with the colostrum derived immune proteins from ***APS 40™***, which work together in forming the required protein-bound immune polysaccharides, differentiating the types of immune cells that the body produces and sends to the damaged joints to speed healing and regrowth.

**Joint Repair - Increase Cushioning:** ***K9 FullFlex™*** Increases joint cushioning and reduces compression in the joints by increasing the amount of synovial fluid in the joint and rebuilding the damaged cartilage itself. This is accomplished through the action of Glucosamine and Chondroitin, which are building blocks for the cartilage and lubricating fluids in the joint. These two ingredients have long been used for increasing joint comfort, but have had rather limited success when used by themselves. However when

these building blocks are combined with the protein growth factors, the growth factors accelerate the rebuilding of new cartilage where the Glucosamine and Chondroitin are more quickly incorporated into the formation of this new cartilage. Primarily it is this rebuilding of the structural cartilage that significantly increases your dog's mobility and joint stability and leads to long term recovery. **K9 FullFlex™** contains a full 10 mg of **Hyaluronic Acid** in each wafer, which the body uses as a lubricant to reduce wear and tear on the joint. It also contains **Stearic Acid** - which is a naturally occurring saturated fatty acid from Beef Fat that acts as a potent joint lubricant - increasing joint comfort. It is this combination of growth factors, lubricants and building blocks in **K9 FullFlex™** that effectively rolls back the clock in terms of joint deterioration.

**Joint Repair - Organic Nano-Calcium Gluconate Complex** – This is the organic form of rapidly bioavailable calcium that is just 1/5 the size of a red blood cell, facilitating its immediate absorption and transport right to the injured and aging joints. This special form of calcium works in conjunction with the growth factors and the other building blocks to go directly to the source of the problem and help rebuild the deteriorated joint in the fastest manner possible.

**Pain Relief - Reduced Inflammation: K9 FullFlex™** contains authentic Green lipped Muscle Concentrate found only in one unique type of shellfish from New Zealand. This shellfish is the world's only source of the specific and unique Omega-3 Polyunsaturated Fatty Acids which clinical research has shown to significantly decrease the inflammation and joint discomfort associated with arthritis and aging.

**Pain Relief: Boswella - K9 FullFlex™** contains compounds that directly decrease your dog's pain resulting from the age-related joint damaged. *Boswella serrata* is a rare herb from India which acts directly on the pain receptors in the same way as the most potent pain reliever known – morphine. But Boswella does this without all the risks and serious side effects involved with the strong pharmaceutical pain relievers. In fact, Boswella has been valued for so long that it was the gift of choice the wise men brought to Jesus over 2000 years ago. In ancient times Boswella was known as Frankincense! Extensive clinical research over the last twenty years has proven that Boswella has great pain relieving properties for osteoarthritis, especially in arthritis of the knee joints.

**K9 FullFlex™** Hip and Joint Formula for senior dogs REALLY WORKS! We are so certain your dog will benefit from this, that we proudly offer a no-questions-asked 100% Money Back Guarantee. If your dog does not show significant improvement after using **K9 FullFlex™** for a full month, please call our toll free number at 1-877-835-6091 and we will arrange for a full refund of your purchase price. What have you got to lose? Ask your Veterinarian for **K9 FullFlex™** today!
